

PIZZA SALES SQL PROJECT

Professional Project Report

Prepared By: Vishal Chauhan

Domain: SQL | Data Analytics

Project: Pizza Sales Analysis

Database: MySQL

Objective: Analyze pizza sales using SQL queries to generate business insights and KPIs.

© Professional SQL Report

Project Overview

This project demonstrates SQL skills through business-oriented analysis of a Pizza Sales dataset. The report includes KPI calculations, revenue analysis, order trends, category-wise performance, best and worst selling pizzas, daily/monthly sales trends and other analytical SQL queries. The objective is to support business decision making using SQL.

Project Contents

- 1. KPI Queries
- 2. Revenue Analysis
- 3. Order Analysis

- 4. Sales Trend Analysis
- 5. Pizza Category Analysis
- 6. Pizza Size Analysis
- 7. Best/Worst Selling Pizzas
- 8. Business Insights
- 9. Complete SQL Queries

Complete SQL Script

The following section contains the complete SQL queries used throughout the Pizza Sales Analysis project.

```
001 | use pizza_db;
002 | select * from pizza_sales;

004 | # 1. Total Revenue:
005 | select sum(total_price) as total_revenue
006 | from pizza_sales;

008 | # 2. Average Order Value
009 | select sum(total_price) / count(distinct order_id) as avg_order_value
010 | from pizza_sales;

012 | # 3. Total Pizzas Sold
013 | select sum(quantity) as total_pizza_sold
014 | from pizza_sales;

016 | # 4. Total Orders
017 | select count(distinct order_id) as total_orders
018 | from pizza_sales;

020 | # 5. Average Pizzas Per Order
021 | select cast(cast(sum(quantity) as decimal(10,2))/
022 | cast(count(distinct order_id) as decimal(10,2)) as decimal(10,2)) as avg_pizzas_per_order
023 | from pizza_sales;

025 | select round(sum(quantity)/count(distinct order_id),2) as avg_pizza_sold
026 | from pizza_sales;

028 | # B. Daily Trend for Total Orders
029 | select dayname(order_date) as order_day, count(distinct order_id) as total_orders
030 | from pizza_sales
031 | group by dayname(order_date);

033 | # C. Monthly Trend for Orders
034 | select monthname(order_date) as order_month , count(distinct order_id) as total_orders
035 | from pizza_sales
036 | group by order_month
037 | order by order_month;

039 | # D. % of Sales by Pizza Category
```

```
040 | select pizza_category, round(sum(total_price) * 100 / (select sum(total_price) from
pizza_sales),2) as sales_percentage
041 | from pizza_sales
042 | group by pizza_category;

044 | # E. % of Sales by Pizza Size
045 | select pizza_size, round(sum(total_price) * 100 / (select sum(total_price) from
pizza_sales),2) as PCT
046 | from pizza_sales
047 | group by pizza_size;

049 | # F. Total Pizzas Sold by Pizza Category
050 | select pizza_category, round(sum(quantity),2) as total_pizza_sold
051 | from pizza_sales
052 | group by pizza_category;

054 | # G. Top 5 Pizzas by Revenue
055 | select * from pizza_sales;

057 | select pizza_name, round(sum(total_price),2) as total_revenue
058 | from pizza_sales
059 | group by pizza_name
060 | order by total_revenue desc
061 | limit 5;

063 | # H. Bottom 5 Pizzas by Revenue
064 | select pizza_name, round(sum(total_price),2) as total_revenue
065 | from pizza_sales
066 | group by pizza_name
067 | order by total_revenue
068 | limit 5;

070 | # I. Top 5 Pizzas by Quantity
071 | select pizza_name, sum(quantity) as total_quantity
072 | from pizza_sales
073 | group by pizza_name
074 | order by total_quantity desc
075 | limit 5;

077 | # J. Bottom 5 Pizzas by Quantity
078 | select pizza_name, sum(quantity) as total_quantity
079 | from pizza_sales
080 | group by pizza_name
081 | order by total_quantity
082 | limit 5;

084 | # K. Top 5 Pizzas by Total Orders
085 | select pizza_name, count(distinct order_id) as total_orders
086 | from pizza_sales
```

```
087 | group by pizza_name
088 | order by total_orders desc
089 | limit 5;

091 | # L. Borrom 5 Pizzas by Total Orders
092 | select pizza_name, count(distinct order_id) as total_orders
093 | from pizza_sales
094 | group by pizza_name
095 | order by total_orders
096 | limit 5;
```

Business Conclusion

The SQL analysis provides meaningful insights into overall revenue, customer ordering behavior, top-performing pizza categories, sales trends, and product performance. These insights help management optimize inventory, pricing strategy, promotional campaigns, and product offerings for improved profitability.
